Course Overview

The Generative AI for Project Managers Certification gives new and experienced PMs a hands-on path to integrate Generative AI into real project workflows — no deep technical background required. Through live sessions and practical exercises with industry-leading AI tools, you'll create project artifacts, sharpen decision-making, and optimize outcomes across Agile, hybrid, and traditional methodologies.

What You'll Learn

- ✓ Master the fundamentals of Generative AI and its role in project management
- ✓ Develop efficient prompting techniques for precise, reliable results
- ✓ Optimize project quality management with AI-powered insights
- ✓ Create project artifacts, documents, and templates using AI tools
- ✓ Apply AI-assisted risk analysis and decision-making strategies
- ✓ Integrate GenAI across Agile, hybrid, and traditional methodologies

Training Highlights

AI-assisted planning, scheduling & risk management
